

# Finance

## Course Overview

The Finance Professional Program is a practical 3-month industry-oriented course designed to help students build strong financial, analytical, accounting, and business management skills required in modern corporate environments.

This course focuses on real-world finance concepts including financial statements, taxation, investment planning, stock market fundamentals, financial modeling, business finance, and Excel-based analysis. Students will gain practical exposure through live case studies, financial projects, and industry-based training.

The program is ideal for students, graduates, commerce learners, aspiring analysts, entrepreneurs, and working professionals who want to build a successful career in finance, banking, investment, or corporate accounting.

---
